ABOUT ME

A fresh Information Technology graduate seeking an opportunity to gain hands-on experience in web development and IT support. Eager to apply programming skills, knowledge of various coding languages, and troubleshooting expertise to contribute in designing, optimizing, and maintaining innovative applications and systems. Passionate about continuous learning and professional growth in the IT field.

EXPERIENCE

On the Job Training

Custard Innovation Corporation | February–May 2025

- Set up, configured, and maintained hardware, software, and network systems to ensure seamless operations.
- Installed and prepared new workstations with proper cables, equipment, and software.
- Managed and reviewed computers and peripheral tools, ensuring uninterrupted IT support.

PROJECTS

- **Grading System Using JAVA GUI (2021)**
 - Final project for senior high school TVL students under the Joint Delivery Voucher Program.
- **E-commerce Website (2023)**
 - Laboratory activity using PHP to create a functional online shopping platform.
- **Visual Novel Game "Touch Me Not" (2025)**
 - Developed An educational platform game using Renpy designed to enhance learning of José Rizal's Noli Me Tangere while boosting students' emotional intelligence through interactive gameplay.
- **Point of Sale (POS) System (2026)**
 - Developed a POS system using Visual Basic, integrating barcode scanning and receipt printing. Designed a modern, user-friendly interface with rounded controls, gradients, and card-style panels for professional use.
